**Enterprise identifier - SIREN**

<b>Definition</b>	The SIREN number is the unique identification number allocated to each enterprise by INSEE.
<b>More information</b>	<p>This number is a simple serial number consisting of 8 digits plus one check digit allowing its validity to be checked.</p> <p>It is allocated only once and is only removed from the register when the legal person ceases to exist (death or cessation of all activity for an unincorporated enterprise, winding up for a legal entity). It will never be used again to register another SIREN unit.</p>
<b>Source and updating</b>	SIRENE register
<b>Length</b>	9
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Establishment internal classification number - NIC**

<b>Definition</b>	The NIC is an internal classification number that serves to distinguish establishments that are part of the same enterprise. It consists of 5 digits. When added to the SIREN, it forms the SIRET number.
<b>More information</b>	It consists of four digits and a fifth one that enables the validity of the SIRET no. to be checked.
<b>Source and updating</b>	SIRENE register
<b>Length</b>	5
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**First line of the establishment's address - L1\_NORMALISEE**

<b>Definition</b>	This variable corresponds to the first line of the establishment's address.
<b>More information</b>	<p>Up to 20 June 2018, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were subject to processing to make them compliant with the RNVP Standard (Restructuring, Standardisation and Postal Validation). At the end of this operation, if it was possible to standardise the address, then: The variable L1_NORMALISEE became the first line of the establishment's addressing in line with the RNVP standard.</p> <p>If not, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were not in line with the RNVP standard but remained address variables identical to variables L1_DECLAREE to L7_DECLAREE.</p> <p>As of 21 June 2018, INSEE had terminated its address processing procedure aimed at compliance with the RNVP standard. Thus, for establishments created from 21 June and those whose address was modified from 21 June 2018, the address is not corrected by the RNVP. The variables ranging from L1_NORMALISEE to L7_NORMALISEE are then identical to variables L1_DECLAREE to L7_DECLAREE. This decision affects only those establishments created from 21 June and those the address of which has been modified from 21 June 2018. For other institutions (created before 21 June 2018 or the address of which has not changed since), variables ranging from L1_NORMALISEE to L7_NORMALISEE are in line with the RNVP standard if the address was successfully standardised, or identical to the variables L1_DECLAREE to L7_DECLAREE otherwise.</p>
<b>Source and updating</b>	Sirene register
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable declared by enterprises and subject to RNVP processing (RNVP = restructuring, normalisation and postal validation). This process allows the addresses in the Sirene dissemination files to be normalised. The normalisation is based on the La Poste standard. INSEE cannot alter the operation carried out on the addresses.

**Second line of the establishment's address - L2\_NORMALISEE**

<b>Definition</b>	This variable corresponds to the second line of the establishment's address.
<b>More information</b>	<p>Up to 20 June 2018, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were subject to processing to make them compliant with the RNVP Standard (Restructuring, Standardisation and Postal Validation). At the end of this operation, if it was possible to standardise the address, then: The variable L2_NORMALISEE became the second line of the establishment's addressing in line with the RNVP standard.</p> <p>If not, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were not in line with the RNVP standard but remained address variables identical to variables L1_DECLAREE to L7_DECLAREE.</p> <p>As of 21 June 2018, INSEE had terminated its address processing procedure aimed at compliance with the RNVP standard. Thus, for establishments created from 21 June and those whose address was modified from 21 June 2018, the address is not corrected by the RNVP. The variables ranging from L1_NORMALISEE to L7_NORMALISEE are then identical to variables L1_DECLAREE to L7_DECLAREE. This decision affects only those establishments created from 21 June and those the address of which has been modified from 21 June 2018. For other institutions (created before 21 June 2018 or the address of which has not changed since), variables ranging from L1_NORMALISEE to L7_NORMALISEE are in line with the RNVP standard if the address was successfully standardised, or identical to the variables L1_DECLAREE to L7_DECLAREE otherwise.</p>
<b>Source and updating</b>	Sirene register
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable declared by enterprises and subject to RNVP processing (RNVP = restructuring, normalisation and postal validation). This process allows the addresses in the Sirene dissemination files to be normalised. The normalisation is based on the La Poste standard. INSEE cannot alter the operation carried out on the addresses.

**Third line of the establishment's address - L3\_NORMALISEE**

<b>Definition</b>	This variable corresponds to the third line of the establishment's address.
<b>More information</b>	<p>Up to 20 June 2018, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were subject to processing to make them compliant with the RNVP Standard (Restructuring, Standardisation and Postal Validation). At the end of this operation, if it was possible to standardise the address, then: The variable L3_NORMALISEE became the third line of the establishment's addressing in line with the RNVP standard.</p> <p>If not, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were not in line with the RNVP standard but remained address variables identical to variables L1_DECLAREE to L7_DECLAREE.</p> <p>As of 21 June 2018, INSEE had terminated its address processing procedure aimed at compliance with the RNVP standard. Thus, for establishments created from 21 June and those whose address was modified from 21 June 2018, the address is not corrected by the RNVP. The variables ranging from L1_NORMALISEE to L7_NORMALISEE are then identical to variables L1_DECLAREE to L7_DECLAREE. This decision affects only those establishments created from 21 June and those the address of which has been modified from 21 June 2018. For other institutions (created before 21 June 2018 or the address of which has not changed since), variables ranging from L1_NORMALISEE to L7_NORMALISEE are in line with the RNVP standard if the address was successfully standardised, or identical to the variables L1_DECLAREE to L7_DECLAREE otherwise.</p>
<b>Source and updating</b>	Sirene register
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable declared by enterprises and subject to RNVP processing (RNVP = restructuring, normalisation and postal validation). This process allows the addresses in the Sirene dissemination files to be normalised. The normalisation is based on the La Poste standard. INSEE cannot alter the operation carried out on the addresses.

**Fourth line of the establishment's address - L4\_NORMALISEE**

<b>Definition</b>	This variable corresponds to the fourth line of the establishment's address.
<b>More information</b>	<p>Up to 20 June 2018, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were subject to processing to make them compliant with the RNVP Standard (Restructuring, Standardisation and Postal Validation). At the end of this operation, if it was possible to standardise the address, then: The variable L4_NORMALISEE became the fourth line of the establishment's addressing in line with the RNVP standard.</p> <p>If not, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were not in line with the RNVP standard but remained address variables identical to variables L1_DECLAREE to L7_DECLAREE.</p> <p>As of 21 June 2018, INSEE had terminated its address processing procedure aimed at compliance with the RNVP standard. Thus, for establishments created from 21 June and those whose address was modified from 21 June 2018, the address is not corrected by the RNVP. The variables ranging from L1_NORMALISEE to L7_NORMALISEE are then identical to variables L1_DECLAREE to L7_DECLAREE. This decision affects only those establishments created from 21 June and those the address of which has been modified from 21 June 2018. For other institutions (created before 21 June 2018 or the address of which has not changed since), variables ranging from L1_NORMALISEE to L7_NORMALISEE are in line with the RNVP standard if the address was successfully standardised, or identical to the variables L1_DECLAREE to L7_DECLAREE otherwise.</p>
<b>Source and updating</b>	Sirene register
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable declared by enterprises and subject to RNVP processing (RNVP = restructuring, normalisation and postal validation). This process allows the addresses in the Sirene dissemination files to be normalised. The normalisation is based on the La Poste standard. INSEE cannot alter the operation carried out on the addresses.

**Fifth line of the establishment's address - L5\_NORMALISEE**

<b>Definition</b>	This variable corresponds to the fifth line of the establishment's address.
<b>More information</b>	<p>Up to 20 June 2018, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were subject to processing to make them compliant with the RNVP Standard (Restructuring, Standardisation and Postal Validation). At the end of this operation, if it was possible to standardise the address, then: The variable L5_NORMALISEE became the fifth line of the establishment's addressing in line with the RNVP standard.</p> <p>If not, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were not in line with the RNVP standard but remained address variables identical to variables L1_DECLAREE to L7_DECLAREE.</p> <p>As of 21 June 2018, INSEE had terminated its address processing procedure aimed at compliance with the RNVP standard. Thus, for establishments created from 21 June and those whose address was modified from 21 June 2018, the address is not corrected by the RNVP. The variables ranging from L1_NORMALISEE to L7_NORMALISEE are then identical to variables L1_DECLAREE to L7_DECLAREE. This decision affects only those establishments created from 21 June and those the address of which has been modified from 21 June 2018. For other institutions (created before 21 June 2018 or the address of which has not changed since), variables ranging from L1_NORMALISEE to L7_NORMALISEE are in line with the RNVP standard if the address was successfully standardised, or identical to the variables L1_DECLAREE to L7_DECLAREE otherwise.</p>
<b>Source and updating</b>	Sirene register
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable declared by enterprises and subject to RNVP processing (RNVP = restructuring, normalisation and postal validation). This process allows the addresses in the Sirene dissemination files to be normalised. The normalisation is based on the La Poste standard. INSEE cannot alter the operation carried out on the addresses.

**Sixth line of the establishment's address - L6\_NORMALISEE**

<b>Definition</b>	This variable corresponds to the sixth line of the establishment's address.
<b>More information</b>	<p>Up to 20 June 2018, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were subject to processing to make them compliant with the RNVP Standard (Restructuring, Standardisation and Postal Validation). At the end of this operation, if it was possible to standardise the address, then: The variable L6_NORMALISEE became the sixth line of the establishment's addressing in line with the RNVP standard.</p> <p>If not, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were not in line with the RNVP standard but remained address variables identical to variables L1_DECLAREE to L7_DECLAREE.</p> <p>As of 21 June 2018, INSEE had terminated its address processing procedure aimed at compliance with the RNVP standard. Thus, for establishments created from 21 June and those whose address was modified from 21 June 2018, the address is not corrected by the RNVP. The variables ranging from L1_NORMALISEE to L7_NORMALISEE are then identical to variables L1_DECLAREE to L7_DECLAREE. This decision affects only those establishments created from 21 June and those the address of which has been modified from 21 June 2018. For other institutions (created before 21 June 2018 or the address of which has not changed since), variables ranging from L1_NORMALISEE to L7_NORMALISEE are in line with the RNVP standard if the address was successfully standardised, or identical to the variables L1_DECLAREE to L7_DECLAREE otherwise.</p>
<b>Source and updating</b>	Sirene register
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable declared by enterprises and subject to RNVP processing (RNVP = restructuring, normalisation and postal validation). This process allows the addresses in the Sirene dissemination files to be normalised. The normalisation is based on the La Poste standard. INSEE cannot alter the operation carried out on the addresses.

**Seventh line of the establishment's address - L7\_NORMALISEE**

<b>Definition</b>	This variable corresponds to the seventh line of the establishment's address.
<b>More information</b>	<p>Up to 20 June 2018, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were subject to processing to make them compliant with the RNVP Standard (Restructuring, Standardisation and Postal Validation). At the end of this operation, if it was possible to standardise the address, then: The variable L7_NORMALISEE became the seventh line of the establishment's addressing in line with the RNVP standard.</p> <p>If not, the variables ranging from L1_NORMALISEE to L7_NORMALISEE were not in line with the RNVP standard but remained address variables identical to variables L1_DECLAREE to L7_DECLAREE.</p> <p>As of 21 June 2018, INSEE had terminated its address processing procedure aimed at compliance with the RNVP standard. Thus, for establishments created from 21 June and those whose address was modified from 21 June 2018, the address is not corrected by the RNVP. The variables ranging from L1_NORMALISEE to L7_NORMALISEE are then identical to variables L1_DECLAREE to L7_DECLAREE. This decision affects only those establishments created from 21 June and those the address of which has been modified from 21 June 2018. For other institutions (created before 21 June 2018 or the address of which has not changed since), variables ranging from L1_NORMALISEE to L7_NORMALISEE are in line with the RNVP standard if the address was successfully standardised, or identical to the variables L1_DECLAREE to L7_DECLAREE otherwise.</p>
<b>Source and updating</b>	Sirene register
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable declared by enterprises and subject to RNVP processing (RNVP = restructuring, normalisation and postal validation). This process allows the addresses in the Sirene dissemination files to be normalised. The normalisation is based on the La Poste standard. INSEE cannot alter the operation carried out on the addresses.

**First line of the address declared for the establishment - L1\_DECLAREE**

<b>Definition</b>	<p>This variable corresponds to the first line of the address declared for the establishment.</p> <p>In most cases, it corresponds to the company name for a legal entity or the title, usual surname and forename of a sole proprietor.</p>
<b>More information</b>	<p>This variable consists of:</p> <ul style="list-style-type: none"><li>- for legal entities, the company's name, condensed into 38 characters</li></ul> <p>NB: not to be confused with the identity of a recipient within an enterprise, who must appear in line 2 of the postal address.</p> <ul style="list-style-type: none"><li>- for unincorporated enterprises, the title in its long form, the usual surname and the forename of the sole proprietor. The usual surname is the name that he/she has stated that he/she wishes to use: it may be his/her own family name or that of his/her spouse or a pseudonym.</li></ul> <p>This variable does not contain any separators.</p> <p>Remark: this variable may be different to the NOMEN_LONG variable in:</p> <ul style="list-style-type: none"><li>- its length since L1_DECLAREE is condensed into 38 characters compare to 131 for NOMEN_LONG</li><li>- the presentation of the name of sole proprietors since NOMEN_LONG gives the birth name.</li></ul>
<b>Source and updating</b>	<p>SIRENE register</p> <p>In the event of a company name changing during the year, this enterprise-level variable is only modified for the establishment(s) modified when the declaration is processed. If there is an update during the year, the other establishments may also see this variable modified.</p>
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Second line of the address declared for the establishment -  
L2\_DECLAREE**

<b>Definition</b>	<p>This variable corresponds to the second line of the address declared for the establishment.</p> <p>This variable may be the enterprise or the establishment's trading name.</p> <p>This is the name under which the company trades and which enables the customers to identify the enterprise.</p> <p>E.g.: a company whose name is "SOCIETE MAISAL" trades under the trading name "Intermarché".</p>
<b>More information</b>	<p>This variable consists, up to the limit of 38 characters, of the following if they are in the register:</p> <ul style="list-style-type: none"><li>- for legal entities: the establishment's brand name, trade name or acronym,</li><li>- for unincorporated enterprises: the establishment's brand name or trade name.</li></ul>
<b>Source and updating</b>	SIRENE register
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Third line of the address declared for the establishment -  
L3\_DECLAREE**

<b>Definition</b>	<p>This variable corresponds to the third line of the address declared for the establishment.</p> <p>This variable can provide precise and often decisive information for the final phase of delivering the post, such as locality, industrial estate, business park, shopping centre, floor, department, etc.</p>
<b>Source and updating</b>	SIRENE register
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Fourth line of the address declared for the establishment -  
L4\_DECLAREE**

<b>Definition</b>	<p>This variable corresponds to the fourth line of the address declared for the establishment.</p> <p>This an item in the address declared by the establishment: building number in the street, "repetition indicator (2A, 2B, etc.), type of street or road and the name of the street or road.</p>
<b>More information</b>	<p>Useful information:</p> <ul style="list-style-type: none"><li>- the building number is a single number (not 52/54 for example), accompanied by a repetition indicator if there is one (A B C D or extension B, T, Q, C for BIS, TER, QUATER, QUINQUIES...).</li><li>- if the building number consists of a series of numbers, only the first one is retained (e.g.: 15 for 15/17)</li><li>- there are never any commas, apostrophes, underlining or dashes after the building number.</li><li>- streets and roads do not necessarily have a specific type. The road name corresponds to its official name. Abbreviations, initials and the omission of words will only be used if the road name is longer than 32 characters.</li></ul>
<b>Source and updating</b>	SIRENE register
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Fifth line of the address declared for the establishment - L5\_DECLAREE**

<b>Definition</b>	<p>This variable corresponds to the fifth line of the address declared for the establishment.</p> <p>It is a special delivery indication such as a post office box (BP). For better postal deliveries, the address is in postal format and this variable corresponds to the fifth line of the postal address.</p>
<b>More information</b>	<p>There are other special indications: postal sectors, TSA (<i>Tri Service Arrivée</i>, arrival sorting) or CS (<i>Course Spéciale</i>, special delivery). It can also be a complement to the sixth line of the address, but not always.</p>
<b>Source and updating</b>	<p>SIRENE register</p>
<b>Length</b>	<p>38</p>
<b>Type</b>	<p>Alphanumeric</p>
<b>Completion</b>	<p>Variable completed in full or partially</p>
<b>Quality</b>	<p>This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.</p>

**Sixth line of the address declared for the establishment -  
L6\_DECLAREE**

<b>Definition</b>	<p>This variable corresponds to the sixth line of the address declared for the establishment.</p> <p>It corresponds to one of the following:</p> <ul style="list-style-type: none"><li>- postcode and name of the locality</li><li>- postcode and name of the delivering post office</li><li>- CEDEX code and CEDEX name</li></ul>
<b>More information</b>	<p>It contains:</p> <p>1/ either the postcode and name of the locality.</p> <p>The postcode may be different to that of the CODPOS variable, which only includes the postcodes of municipalities or delivering post offices if the municipality has several delivering post offices. The name of the locality is its official name as recorded in the COG (<i>Code Officiel Géographique</i>, Official Geographic Code)</p> <p>2 / or the postcode and the name of the delivering post office, especially in the Overseas Departments (DOM).</p> <p>In this case the name of the municipality appears in the previous line of the address.</p> <p>3 / or the CEDEX code (<i>Courrier d'Entreprise à Distribution EXceptionnelle</i>, special business postal deliveries) and the CEDEX name.</p> <p>The CEDEX code enables business post to be clearly and precisely identified, and to receive specific treatment. In these cases, the code is followed by the cedex name (name of the town followed by the word "cedex" and sometimes a number (e.g.: 75675 Paris cedex 14). If it concerns a special delivery service, the name of the special delivery will be noted (e.g.: <i>Armées</i>). Postcodes and CEDEX codes are items that specify the post office that will deliver the post. These are postal organisation data that must be used as they are. For addresses abroad, this sixth line may include a code if there is one in the country concerned, followed by the name of the locality. It is always followed by the seventh line, which contains the name of the country.</p>
<b>Source and updating</b>	SIRENE register
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Seventh line of the address declared for the establishment -  
L7\_DECLAREE**

<b>Definition</b>	<p>This variable corresponds to the seventh line of the address declared for the establishment.</p> <p>It is the name of the country for addresses abroad.</p>
<b>Source and updating</b>	<p>SIRENE register</p> <p>This variable consists of geographical data from the SIRENE register.</p> <p>The classification used is that of the COG (<i>Code Officiel Géographique</i>, Official Geographic Code) which is available from INSEE and on the website <a href="http://www.insee.fr">http://www.insee.fr</a> under the heading "Classifications".</p>
<b>Length</b>	38
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Building number in the street - NUMVOIE**

<b>Definition</b>	This variable gives the number of the building in the street included in the establishment's address. It is not always completed.
<b>More information</b>	This is an optional variable. When it is completed, it is right justified so that it can easily be associated with a repetition indicator (INDREP)
<b>Source and updating</b>	SIRENE register
<b>Length</b>	4
<b>Type</b>	Alphanumeric NB: this variable is right justified.
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	INSEE has no control over the quality of this variable. It is either not certified as it is declared by enterprises and not checked by INSEE, or it comes from a source exogenous to the register (survey, administrative source, etc.).

**Repetition indicator - INDREP**

<b>Definition</b>	This variable is an item in the establishment's address. It indicates the repetition of the building number in the street (Bis, Ter (2A, 2B), etc.). It must be associated with the building number variable (NUMVOIE).
<b>More information</b>	Only alphabetical values are accepted. The default value is a blank " ".
<b>Source and updating</b>	SIRENE register
<b>Length</b>	1
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	INSEE has no control over the quality of this variable. It is either not certified as it is declared by enterprises and not checked by INSEE, or it comes from a source exogenous to the register (survey, administrative source, etc.).
<b>List of modalities</b>	B bis T ter Q quater C quinquies

There may also, in exceptional cases, be sequential repetitions using A, B, C, D, etc.

**Type of street or road of establishment location - TYPVOIE**

<b>Definition</b>	This variable indicates the type of street or road where the establishment is located (street, avenue, lane et.).  It is not always completed, or sometimes there are no street names in very small villages.
<b>More information</b>	Only alphabetical values are accepted. The default value is a blank " ".
<b>Source and updating</b>	SIRENE register
<b>Length</b>	4

**Name of street or road of establishment location - LIBVOIE**

<b>Definition</b>	This variable indicates the name of the street or road in the municipality where the establishment is located.
<b>More information</b>	This variable is not always completed, in particular in small villages. The list of abbreviations authorised is that of the functional information exchange standard which corresponds to that of AFNOR standard Z 10-011.
<b>Source and updating</b>	SIRENE register
<b>Length</b>	32
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Postcode - CODPOS**

<b>Definition</b>	This variable indicates the postcode of the establishment's address, as used by the post office.
<b>More information</b>	Sometimes it can be different to the one in variables L6_NORMALISEE and L6_DECLAREE (sixth line of the normalised or declared address). This is the postcode attached to the address. This situation arises when the establishment has a Cedex address, for example, or when its post is delivered by a different post office to that of the municipality where it is located.

**Department of establishment location - DEPET**

<b>Definition</b>	This variable corresponds to the department where the establishment is located.
<b>More information</b>	For establishments located abroad (case head of registered offices of French establishments), the DEPET code is 99. The country of location is then identifiable by the COMET code.
<b>Source and updating</b>	<p>SIRENE register</p> <p>The departments are defined in the COG (<i>Code Officiel Géographique</i>, Official Geographic Code) available on the INSEE website: <a href="https://www.insee.fr/fr/information/2114819">https://www.insee.fr/fr/information/2114819</a>.</p> <p>Variable updated in May (integration of the changes to the COG (<i>Code Officiel Géographique</i>, Official Geographic Code) on 1 January of the current year)</p> <p>NB: these updates are not systematically visible in the monthly and daily update files. **Canton of establishment location - CTONET**

<b>Definition</b>	This variable corresponds to the canton where the establishment is located.
<b>More information</b>	<p>This variable is completed for units situated in France.</p> <p>The cantons of the departments in Metropolitan France use 2 left-justified positions. The cantons of the Overseas Departments use 3 positions, with the position on the left characterising the department: 1 Guadeloupe, 2 Martinique, 3 French Guiana, 4 Réunion, 6 Mayotte.</p> <p>Cantons consist of 1 or more entire municipalities, portions of municipalities or even both. When a municipality is divided up into several cantonal fractions, a canton code is allocated for the entire municipality (classification greater than 80): it is this code that appears in Sirene files.</p>
<b>Source and updating</b>	<p>Geographic reference base</p> <p>Variable updated in May (integration of the changes to the COG (<i>Code Officiel Géographique</i>, Official Geographic Code) on 1 January of the current year)</p> <p>NB: these updates are not systematically visible in the monthly and daily update files. **Department of the urban unit of establishment location - DU**

<b>Definition</b>	<p>This variable corresponds to the department of the urban unit where the establishment is located. This variable is to be linked with the urban unit and the size of the urban unit.</p> <p>The urban unit is a municipality or set of municipalities that includes within its boundaries a built-up zone with at least 2,000 inhabitants where no dwelling is more than 200 metres away from the nearest one to it. In addition, each municipality concerned has more than half its population in that built-up zone.</p>
<b>More information</b>	<p>It is completed for establishments situated in French departments and also belonging to urban units. It is not completed for addresses abroad.</p> <p>This variable identifies the department of the urban unit (DU):</p> <ul style="list-style-type: none"><li>- 00 for inter-department urban units</li><li>- code of the department for intra-department urban units in Metropolitan France</li><li>- 9A for Guadeloupe</li><li>- 9B for Martinique</li><li>- 9C for French Guiana</li><li>- 9D for Reunion</li></ul> <p>E.g.: NIORT belongs to an urban unit situated in the department of Deux-Sèvres (DU = 79).</p>
<b>Source and updating</b>	<p>The geographical zoning was updated in 2010.</p> <p>Variable updated in May (integration of the changes to the COG (<i>Code Officiel Géographique</i>, Official Geographic Code) on 1 January of the current year)</p> <p>NB: these updates are not systematically visible in the monthly and daily update files. They are only mentioned in them if another movement affects the establishment. **Size of the urban unit - TU****Definition**

This variable corresponds to the size of the urban unit in terms of the population bracket into which the municipality where the establishment is located falls.

The urban unit is a municipality or set of municipalities that includes within its boundaries a built-up zone with at least 2,000 inhabitants where no dwelling is more than 200 metres away from the nearest one to it. In addition, each municipality concerned has more than half its population in that built-up zone.

**More information**

This variable is to be linked with the department of the Urban Unit (DU) and its number (UU).

It is completed for establishments situated in French departments and also belonging to urban units.

It corresponds to the population bracket (TU) without double counts in the last census of the entire urban unit (for international urban units, only the municipalities situated in France are counted).

Example: Niort belongs to the 50,000 to 99,999 inhabitant urban unit population bracket (TU = 5).

**Source and updating**

The geographical zoning was updated in 2010.

Variable updated in May (integration of the changes to the COG (*Code Officiel Géographique*, Official Geographic Code) on 1 January of the current year)

NB: these updates are not systematically visible in the monthly and daily update files. They are only mentioned in them if another movement affects the establishment. To apply all the updates to this variable, it is indispensable to integrate the stock file from the beginning of July into the processing sequences.

**List of modalities**

- 0 Establishment located in a rural municipality
- 1 Urban unit with less than 5,000 inhabitants
- 2 Urban unit with 5,000 to 9,999 inhabitants
- 3 Urban unit with 10,000 to 19,999 inhabitants
- 4 Urban unit with 20,000 to 49,999 inhabitants
- 5 Urban unit with 50,000 to 99,999 inhabitants
- 6 Urban unit with 100,000 to 199,999 inhabitants
- 7 Urban unit with 200,000 to 1,999,999 inhabitants
- 8 Paris conurbation

**Number of the urban unit - UU**

<b>Definition</b>	<p>This variable gives the code of the urban unit. The urban unit is a municipality or set of municipalities that includes within its boundaries a built-up zone with at least 2,000 inhabitants where no dwelling is more than 200 metres away from the nearest one to it. In addition, each municipality concerned has more than half its population in that built-up zone.</p> <p>This urban unit code is a serial number allocated to each urban unit within a department.</p>
<b>More information</b>	<p>This variable is to be linked with the Department of the Urban Unit and the Size of the Urban Unit (DU and TU). It is completed for establishments situated in French departments and also belonging to urban units.</p> <p>An urban unit consisting of several municipalities is called a conurbation.</p> <p>This variable corresponds to a serial number allocated to each urban unit (UU) within each of the urban unit population bracket classes (TU), in an increasing sequence according to the population without double counts in each department for urban units in a single department (01 to 49), in the whole of France for inter-department urban units (51 to 99).</p> <p>Example: the Niort urban unit is the first urban unit (UU = 01) in the bracket (TU = 5) in department 79.</p>
<b>Source and updating</b>	<p>The geographical zoning was updated in 2010.</p> <p>Variable updated in May (integration of the changes to the COG (<i>Code Officiel Géographique</i>, Official Geographic Code) on 1 January of the current year)</p> <p>NB: these updates are not systematically visible in the monthly and daily update files. **Location of the establishment in a public inter-municipality cooperation establishment - EPCI**

<b>Definition</b>	Public Inter-Municipal Cooperation Establishments (EPCIs) are groupings of municipalities whose purpose is to develop "joint development projects within perimeters of solidarity". They are subject to common, homogeneous rules that are comparable to those of local authorities. EPCI with taxation powers are entitled to raise their own taxes. These are urban communities, conurbation communities, conurbation communities, and communities of municipalities. Only these types of EPCI are available.
<b>More information</b>	The codes of the EPCIs correspond to their SIREN number.
<b>Source and updating</b>	Geographic reference base  Variable updated in May (integration of the changes to the COG ( <i>Code Officiel Géographique</i> , Official Geographic Code) on 1 January of the current year)  NB: these updates are not systematically visible in the monthly and daily update files. They are only mentioned in them if another movement affects the establishment. To apply all the updates to this variable, it is indispensable to integrate the stock file from the beginning of July into the processing sequences.

**Employment zone - ZEMET**

**Definition** This variable gives the employment zone where the establishment is located.  
An employment zone is a geographical area within which most of the labour force lives and works, and in which establishments can find the main part of the labour force necessary to occupy the offered jobs.

**More information** The division into employment zones provides a breakdown of the territory adapted to local studies of the employment market. The zoning also defines relevant territories for local diagnoses and can guide the demarcation of territories for the implementation of territorial policies by public authorities or local actors. This zoning is defined both for Metropolitan France and for the Overseas Departments (DOM).

The updated breakdown is based on the flows of movement from residence to work of active persons observed during the 2006 census.

The employment zone consists of 4 digits. The first two digits correspond to the region code (00 if the employment zone cuts across several regions) and the last two to a serial number - examples: 7209 Agen, 0061 Toulouse.

**Source and updating** This geographical zoning dates from 2010 and concerns the regions as they existed prior to the territorial reform of 2016.

Variable updated in May (integration of the changes to the COG (*Code Officiel Géographique*, Official Geographic Code) on 1 January of the current year)

NB: these updates are not systematically visible in the monthly and daily update files. They are only mentioned in them if another movement affects the establishment. To apply all the updates to this variable, it is indispensable to integrate the stock file from the beginning of July into the processing sequences.

**Establishment is a registered office or not - SIEGE**

<b>Definition</b>	This variable indicates whether the establishment is a registered office or not. When an enterprise carries out its activities in several establishments, one of them must have the status of registered office.
<b>More information</b>	<p>Every enterprise has only one establishment that is the registered office.</p> <p>When an enterprise has only one establishment, it necessarily has the status of registered office.</p> <p>The first establishment created for a newly created enterprise is necessarily its registered office. Any extra establishments created necessarily have non-registered office status, unless the registered office is transferred.</p>
<b>Source and updating</b>	<p>SIRENE register</p> <p>This variable is completed from information declared by enterprises.</p>

<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.
<b>List of modalities</b>	<p>1 Registered office establishment</p> <p>0 Non-registered office establishment</p>

**Brand name or operating name - ENSEIGNE**

<b>Definition</b>	This is the name used to refer to the location or premises where the business is carried on. It enables the clientele to identify the establishment easily (brand name or operating name). Where one exists, the brand name constitutes the second line of the geo-postal address of the establishment. Example: "Coiff Land" is the brand name of the hairdressing salon belonging to the unincorporated enterprise named "Mrs Justine Martin".
<b>Source and updating</b>	SIRENE register
<b>Length</b>	40
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	INSEE has no control over the quality of this variable. It is either not certified as it is declared by enterprises and not checked by INSEE, or it comes from a source exogenous to the register (survey, administrative source, etc.).

**Direct mailing scope indicator - IND\_PUBLIPO**

<b>Definition</b>	<p>This variable is an indicator of the direct mailing scope which indicates whether the establishment belongs to this scope or not.</p> <p>The direct mailing scope corresponds to the establishments that are both part of the direct mailing areas of interest and whose address quality is considered as sufficient.</p>
<b>More information</b>	<p>Direct mailing areas of interest correspond to:</p> <ul style="list-style-type: none"><li>- productive establishments, with certain sectors of activity being added or removed,</li><li>- non-productive employer establishments (establishment with a positive workforce, providers of personnel).</li></ul> <p>The address quality deemed sufficient for direct mailing is based on known information about the establishment concerning Undelivered Letters (PND), restated addresses and other changes in the register.</p>

**Establishment's dissemination status - DIFFCOM**

<b>Definition</b>	This variable indicates whether a sole proprietor has exercised his right not to be included in INSEE file dissemination, in accordance with Article A123-96 of the Commercial Code.
<b>More information</b>	<p>Article A123-96 of the Commercial Code states that:</p> <p>"Any physical person may request directly at the time of the creation or modification formalities or by sending a letter to the Director Général of INSEE (National Institute of Statistics and Economic Studies) that the information in the register concerning him/her not be made available for use by third parties other than the organisations authorised under Article R. 123-224 or public authorities, for prospecting purposes, commercial in particular.</p> <p>As soon as a natural person exercises their right of opposition, this leads to VMAJ="O" in the update files and to the disappearance of the establishment concerned from the stock file.</p> <p>The information concerning this establishment can no longer be disseminated or used for prospecting purposes.</p>
<b>Source and updating</b>	SIRENE register

**Year and month of establishment's entry into the dissemination database - AMINTRET**

<b>Definition</b>	<p>This variable gives the year and month when the establishment was entered into the Sirene database.</p> <p>This variable is intended for a well-informed public.</p>
<b>More information</b>	<p>For new establishments, this variable is generally close to the effective date of the event of creation or re-activation of the establishment. However, the month of entry may be different (earlier or later than the variable indicating the establishment's date of creation). For example, certain entrepreneurs may make an early declaration of the creation of an enterprise in order to facilitate certain administrative formalities.</p>

<b>List of modalities</b>	<p>This variable is codified in six characters in YYYYMM format with the year (YYYY) and the month (MM).</p>

**Nature of the establishment of a sole proprietor - NATETAB**

<b>Definition</b>	This is the type of activity exercised by sole proprietors (craftsperson, trader, liberal professional, etc.).												
<b>More information</b>	<p>The occupational category (craftsperson or liberal professional) is not one of the variables mentioned by Article A123-88 of the Commercial Code defining the data recorded in the Sirene register for natural persons. However, for its dissemination files INSEE calculates a NATETAB variable at establishment level (and not at legal unit level).</p> <p>Consequently, this variable cannot be used as an element of appreciation for the application of regulations or contracts. It is used under the responsibility of the organisation that chooses to use it, and cannot suffice to create any rights or obligations towards or incumbent upon the units concerned.</p> <p>This variable is left blank for legal entities.</p>

<b>List of modalities</b>	See the variable "Nature of the establishment of a sole proprietor - NATETAB"

**Principal activity of the establishment - APET700**

<b>Definition</b>	<p>When it is entered in the SIRENE register, each of an enterprise's establishments is allocated a code by INSEE that characterises its principal activity, known as the APE (Principal Activity) code. The APE code is based on the <i>Nomenclature d'Activités Française</i> (French Classification of Activities) (NAF: Rév2 2008). Establishments in the same enterprise may have different activities.</p>
<b>More information</b>	<p>This variable is systematically completed.</p> <p>If an enterprise has only one establishment, the establishment's APE (APET) is the same as that of the enterprise (APEN). It can happen that at the time of declaring the enterprise, INSEE is not able to allocate the right APE code: in this case the modality 0000Z can be assigned to it temporarily.</p> <p>Decree no. 2007-1888 of 26 December 2007 on the approval of classifications of activities and products states:</p> <ul style="list-style-type: none"><li>- the allocation by INSEE (National Institute of Statistics and Economic Studies), for statistical purposes, of a code characterising the principal activity (APE code) with reference to the classification of activities cannot suffice to create any rights or obligations towards or incumbent upon the units concerned.</li><li>- the modalities of application, and in particular the classification of economic units under precise categories in these classifications by a public authority or department with a view to a specific (non-statistical) use of these classifications are entirely the responsibility of the user department.</li><li>- if a regulation or contract refers to these classifications, the signatories are entirely responsible for the scope they intend them to cover. It is their responsibility to explain that scope in as much detail as necessary.</li></ul>
<b>Source and updating</b>	<p>SIRENE register</p> <p>The APET700 code is entered in the SIRENE register at the time of declaring the enterprise.</p> <p>It may be updated following a declaration by the enterprise or on the basis of surveys carried out either for statistical purposes or to improve the register.</p>

**Year of validity of the establishment's principal activity - DAPET**

<b>Definition</b>	This is the last date of validation of the establishment's APE (principal activity). This variable is a supplementary piece of information on the establishment's activity.
<b>More information</b>	This date is mandatory. A "fictitious" date can be provided, connected to either the date of creation or the date of starting the activity.
<b>Source and updating</b>	SIRENE register  It is updated whenever there is a modification of the establishment's activity (APET700).
<b>Length</b>	4
<b>Type</b>	Alphanumeric  It takes the form: YYYY
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Size of establishment's salaried workforce - TEFET**

<b>Definition</b>	This variable corresponds to the size of the establishment's salaried workforce. It is a statistical variable, provided for the 31/12 of a given year, usually year n-2. It is to be linked with its date of validity, that is to say the date when the establishment's salaried workforce was updated.
<b>Source and updating</b>	SIRENE register  Variable updated twice a year, at the end of June and the end of December. Modifications appear in movements in the daily and monthly update files. The values are updated in the stock files at the beginning of July and the beginning of January.
<b>Length</b>	2
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	INSEE has no control over the quality of this variable. It is either not certified as it is declared by enterprises and not checked by INSEE, or it comes from a source exogenous to the register (survey, administrative source, etc.).
<b>List of modalities</b>	<p>NN Non-employer units (no salaried workers during the reference year and no workforce on 31/12) or units with no update to the workforce</p> <p>00 0 salaried workers (units which have had salaried workers during the reference year, but no longer have a workforce on 31/12)</p> <p>01 1 or 2 salaried workers</p> <p>02 3 to 5 salaried workers</p> <p>03 6 to 9 salaried workers</p> <p>11 10 to 19 salaried workers</p> <p>12 20 to 49 salaried workers</p> <p>21 50 to 99 salaried workers</p> <p>22 100 to 199 salaried workers</p> <p>31 200 to 249 salaried workers</p> <p>32 250 to 499 salaried workers</p> <p>41 500 to 999 salaried workers</p> <p>42 1,000 to 1,999 salaried workers</p> <p>51 2,000 to 4,999 salaried workers</p> <p>52 5,000 to 9,999 salaried workers</p> <p>53 10,000 salaried workers and more</p>

**Wording of the size of the establishment's salaried workforce - LIBTEFET**

<b>Definition</b>	This variable corresponds to the wording of the size of the establishment's salaried workforce. It is a statistical variable, provided for the 31/12 of a given year, usually year n-2. It is to be linked with its date of validity, that is to say the date when the establishment's salaried workforce was updated.
<b>More information</b>	The size of the salaried workforce is determined for the salaried workforce of the enterprise (TEFEN) and for each of its establishments (TEFET).
<b>Source and updating</b>	SIRENE register
<b>Length</b>	23
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	INSEE has no control over the quality of this variable. It is either not certified as it is declared by enterprises and not checked by INSEE, or it comes from a source exogenous to the register (survey, administrative source, etc.).
<b>List of modalities</b>	See the variable "Size of establishment's salaried workforce - TEFET"

**Salaried workforce of the establishment to the nearest hundred - EFETCENT**

<b>Definition</b>	This variable corresponds to the effective workforce of the establishment to the nearest hundred. It is a statistical variable, provided for the 31/12 of a given year, usually year n-2. It is to be linked with its date of validity, that is to say the date when the establishment's salaried workforce was updated.
<b>More information</b>	The code always corresponds to the lowest figure of the bracket. From 100, it is the salaried workforce rounded down to the nearest hundred that is given.
<b>Source and updating</b>	SIRENE register  Variable updated twice a year, at the end of June and the end of December. Modifications appear in movements in the daily and monthly update files. The values are updated in the stock files at the beginning of July and the beginning of January.
<b>Length</b>	6
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	INSEE has no control over the quality of this variable. It is either not certified as it is declared by enterprises and not checked by INSEE, or it comes from a source exogenous to the register (survey, administrative source, etc.).
<b>List of modalities</b>	NN Non-employer units (no salaried workers during the reference year and no workforce on 31/12) This bracket may contain some unknown workforces  0 0 salaried workers (no workforce on 31/12, but employed has salaried workers during the reference year)  1 1 to 2 salaried workers  3 3 to 5 salaried workers  6 6 to 9 salaried workers  10 10 to 19 salaried workers  20 20 to 49 salaried workers  50 50 to 99 salaried workers  100 100 to 199 salaried workers  200 200 to 299 salaried workers  .../... from 100 to 100 up to 999,999 salaried workers

**Year of validity of the establishment's salaried workforce - DEFET**

<b>Definition</b>	<p>This is the year of the last update of the establishment's salaried workforce.</p> <p>This variable is a supplementary piece of information on the size of the establishment's salaried workforce.</p>
<b>More information</b>	<p>This variable gives the year of the last update of the establishment's salaried workforce, however its updating may have no effect on the size bracket the establishment is in (TEFET).</p> <p>In the case of enterprises with only one establishment, the date of updating of the enterprise's workforce (DEFEN) and the establishment's (DEFET) are the same.</p>
<b>Source and updating</b>	<p>SIRENE register</p> <p>Variable updated twice a year, at the end of June and the end of December. Modifications appear in movements in the daily and monthly update files. The values are updated in the stock files at the beginning of July and the beginning of January.</p>
<b>Length</b>	4

<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Origin of the creation of the establishment - ORIGINE**

<b>Definition</b>	This variable gives the declared origin of the establishment (creation, takeover, etc.).
<b>Source and updating</b>	SIRENE register  This variable is completed at the time of creation based on the establishment's declaration.
<b>Length</b>	2
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	INSEE has no control over the quality of this variable. It is either not certified as it is declared by enterprises and not checked by INSEE, or it comes from a source exogenous to the register (survey, administrative source, etc.).

<b>List of modalities</b>	"" Not applicable
	1 Creation (for any type of declaration)
	3 Purchase (for non-agricultural declarations)
	4 Contribution (for non-agricultural declarations)
	6 Taking under lease management (for non-agricultural declarations)
	7 Division (for non-agricultural declarations)
	8 Takeover (for non-agricultural declarations)
	9 Other (for non-agricultural declarations)
	A Complete takeover of a holding (for agricultural declarations)
	B Continuation of a farm business by a spouse (for agricultural declarations)
	C Transfer of ownership (for agricultural declarations)
	D Contribution of an individual holding or holdings (for agricultural declarations)
	E Total or partial takeover of an individual holding (agricultural declarations)
	F Commission-based management
	NR Not completed

The "Not applicable" modality is used when the declaring unit is not concerned by this variable.

The "NR" modality is used when the declaring unit does not fit into any of the modalities available.

Remark: two other modalities can still be found for this variable: 2 (transfer of activity) and 5 (takeover) for this variable. These modalities are from an old version of the inter-authority exchange standard used by INSEE and its partners. As not all administrative authorities have adopted the current version and as these are declared modalities, they cannot be changed in the SIRENE register.

**Date of creation of the establishment - DCRET**

<b>Definition</b>	This variable gives the date when the establishment was created.
<b>More information</b>	Even in the case of the re-activation of an establishment, this variable keeps the initial date of creation of the establishment in the register.
<b>Source and updating</b>	SIRENE register
<b>Length</b>	8
<b>Type</b>	Alphanumeric  It is in YYYYMMDD format.  This day may contain only partial information (older units in the Sirene register). It has only been completed systematically since 1980. Before that date, it was taken from the different trade and companies, industry registers, etc.
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Date of beginning of activity - DDEBACT**

<b>Definition</b>	Date from which the establishment has been active without interruption.
<b>More information</b>	It is not mandatory to complete this variable. The information is calculated from the enterprise's date of starting its activity.
<b>Source and updating</b>	SIRENE register
<b>Length</b>	8
<b>Type</b>	Alphanumeric Format: YYYYMMDD
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Nature of the establishment's activity - ACTIVNAT**

<b>Definition</b>	This variable provides supplementary information on the activity exercised by the establishment (transport, retail, services, etc.).
<b>Source and updating</b>	SIRENE register
<b>Length</b>	2
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	INSEE has no control over the quality of this variable. It is either not certified as it is declared by enterprises and not checked by INSEE, or it comes from a source exogenous to the register (survey, administrative source, etc.).

<b>List of modalities</b>	"" Not applicable
	03 Extraction
	04 Manufacturing, production
	05 Assembly, installation
	06 Repair
	07 Transport
	08 Import, export
	09 Wholesalers, including on a fee or contract basis
	10 Retail trade
	11 Liberal profession
	12 Services
	13 Renting of furnished accommodation
	14 Construction, civil engineering
	15 Business services
	20 Principal
	99 Other
	NR Not completed

The "Not applicable" modality is used when the declaring unit is not concerned by this variable.

The "NR" modality is used when the declaring unit does not fit into any of the modalities available.

Remark: two other modalities can still be found for this variable: 01 (construction works) and 02 (civil engineering) for this variable. These modalities are from an old version of the inter-authority exchange standard used by INSEE and its partners. As not all administrative authorities have adopted the current version and as these are declared modalities, they cannot be changed in the SIRENE register.

**Place of the establishment's activity - LIEUACT**

**Definition** This is the establishment's place of activity declared at the time of its creation (office, factory, etc.).

**Source and updating** SIRENE register  
This variable is a declared piece of information obtained at the time of the establishment's creation. It is complementary to the principal activity.

**Length** 2

**Type** Alphanumeric

**Completion** Variable completed in full or partially

**Quality** INSEE has no control over the quality of this variable. It is either not certified as it is declared by enterprises and not checked by INSEE, or it comes from a source exogenous to the register (survey, administrative source, etc.).

**List of modalities**

""	Not applicable
02	Mine, quarry
04	Depot, warehouse
05	Shop
07	Office, chambers
08	Factory
09	Workshop
91	On a worksite
92	On a market
93	On customers' premises
99	Other
NR	Not completed

The "Not applicable" modality is used when the declaring unit is not concerned by this variable.

Modality 99 is entered when the declaring unit is unable to enter one of the other modalities. Example: for the ACTIVNAT variable, 99 is entered if the unit has no extraction, manufacturing activity, etc.

The "NR" modality is used when the declaring unit does not fit into any of the modalities available.

Remark: two other modalities can still be found for this variable: 01 (agricultural holding) and 03 (factory, workshop) for this variable. These modalities are from an old version of the inter-authority exchange standard used by INSEE and its partners. As not all administrative authorities have adopted the current version and as these are declared modalities, they cannot be changed in the SIRENE register.

**Type of shop - ACTISURF**

<b>Definition</b>	This variable indicates, according to the floor area declared at the time of creation, to what type of shop the establishment corresponds.
<b>More information</b>	<p>It is calculated according to the floor area of the commercial establishment concerned.</p> <p>The modalities of this variable are separate from the thresholds used in the NAF to classify retail outlets (less than 120m<sup>2</sup>, from 120m<sup>2</sup> to 400m<sup>2</sup>).</p>
<b>Source and updating</b>	<p>SIRENE register</p> <p>This variable is calculated using a declared piece of information obtained at the time of the establishment's creation.</p>
<b>Length</b>	2
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	INSEE has no control over the quality of this variable. It is either not certified as it is declared by enterprises and not checked by INSEE, or it comes from a source exogenous to the register (survey, administrative source, etc.).
<b>List of modalities</b>	<p>"" Not applicable</p> <p>1 Less than 300 m<sup>2</sup></p> <p>2 From 300 m<sup>2</sup> to under 400 m<sup>2</sup></p> <p>3 From 400 m<sup>2</sup> to under 2,500 m<sup>2</sup></p> <p>4 2,500 m<sup>2</sup> or over</p>

The "Not applicable" modality is used when the declaring unit is not concerned by this variable.

**Seasonal nature of the establishment's activity - SAISONAT**

<b>Definition</b>	This variable indicates whether the establishment has a permanent or seasonal activity. It is seasonal if the establishment ceases its activities completely for a period of more than three consecutive months.
<b>More information</b>	<p>This variable is subject to coherence checks based on the establishment's activity.</p> <p>For example, agricultural activities can be seasonal whereas chemical industries do not have seasonal activities.</p>
<b>Source and updating</b>	SIRENE register

**Legal form of the enterprise - NJ****Definition**

This variable is a supplementary piece of information on the enterprise to which the establishment belongs. The legal form corresponds to the legal category for legal entities (for example SARL - a limited liability company).

**More information**

The legal form describes the legal status of the enterprise only for legal entities:

- for legal entities under private law, the legal category is determined based on the sections (category and legal form) in the declaration form filled in at the time of creation.

- for public organisations, the legal form is determined by the regulation under which they are created.

The NJ code is allocated by INSEE with reference to the classification of legal categories. The code consists of 4 characters for legal entities and is left blank for unincorporated enterprises. The first 2 characters correspond to the fundamental legal criteria of the law relating to legal entities. An enterprise, a legal entity, can change legal category during its existence. This has an impact on the enterprise's existence in particular (SIREN). Enterprises can be allocated modalities not referenced in the official classification of legal categories. These anomalies may be attributable to provisional codification or updates that have not yet been made. In fact, it can happen that the legal status of certain units has not been modified following the creation and deletion of modalities. In general, these anomalies are picked up each year and are the subject of register improvement surveys (EARs).

**Principal activity of the enterprise - APEN700****Definition**

When it is entered in the SIRENE register, every enterprise is allocated a code by INSEE that characterises its principal activity, known as the APE (Principal Activity) code. The APE code of enterprises and establishments is based on the *Nomenclature d'Activités Française* (French Classification of Activities) (NAF: Rév2 2008).

**More information**

This variable is systematically completed.

Where possible, the enterprise's principal activity is determined according to the breakdown of the activities of the establishments. If an enterprise has only one establishment, the APET is the same as the APEN. It can happen that at the time of declaring the enterprise, INSEE is not able to allocate the right APE code: in this case the modality 0000Z can be assigned to it temporarily.

Decree no. 2007-1888 of 26 December 2007 on the approval of classifications of activities and products states:

- the allocation by INSEE (National Institute of Statistics and Economic Studies), for statistical purposes, of a code characterising the principal activity (APE code) with reference to the classification of activities cannot suffice to create any rights or obligations towards or incumbent upon the units concerned.

- the modalities of application, and in particular the classification of economic units under precise categories in these classifications by a public authority or department with a view to a specific (non-statistical) use of these classifications are entirely the responsibility of the user department.

- if a regulation or contract refers to these classifications, the signatories are entirely responsible for the scope they intend them to cover. It is their responsibility to explain that scope in as much detail as necessary.

**Source and updating**

SIRENE register

The APEN700 code is entered in the SIRENE register at the time of declaring the enterprise.

It may be updated following a declaration by the enterprise or on the basis of surveys carried out either for statistical purposes or to improve the register.

<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Principal activity in the trade register - APRM**

**Definition** This variable corresponds to the code for the activity exercised by a craftsperson registered with the trades register (Régistre des Métiers, RM). A craft activity is that of a self-employed professional who exercises a manual trade, often of a traditional nature, either alone or with a few other people (family, qualified tradesmen, apprentices, employees, etc.).

**More information** In the SIRENE register, the concept of a craft activity corresponds to the activity of any enterprise (sole proprietor or legal entity) or any establishment that can be registered with the trades register (RM). It is defined by a regulation (Decree no. 98-247 of 2 April 1998 on craft qualifications and the trades register). Two criteria are taken into account:

- size: the enterprise may have a craft activity as long as it does not employ more than 10 permanent salaried workers (except for special cases such as an enterprise with more than 10 salaried workers which was classed as a craft enterprise when it had 10 salaried workers or less, which is entitled to retain its status as a craft enterprise).

- the type of activity: these are mainly industrial activities, construction and civil engineering activities, repair activities and a few service activities (the Law of 5 July 1996 defines in relation to the NAF the types of activity that can be registered with the trades register (RM)).

This activity is allocated to the main establishment whenever one of the enterprise's establishments, whichever it may be, carries on a craft activity, even as a secondary activity. It is therefore quite common to find registered office establishments with an APE that is different to the APRM. For example, a registered office that sells clothes with a secondary establishment that is an alterations workshop. It can therefore be supposed that all enterprises with a craft activity are registered with the trades register (RM) and therefore have an APRM code.

**Source and updating** SIRENE register

If the information declared is not detailed enough in the declaration, a default code may have been allocated according to the activity declared. For the moment, this variable has not been updated.

<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**List of modalities**

PME (SME, small and medium-sized enterprise) The category of small and medium-sized enterprises (SMEs) is made up of enterprises that employ fewer than 250 people and have an annual turnover of less than €50 million or a balance sheet total not exceeding €43 million. This category includes microenterprises.

ETI (Intermediate-sized enterprise): An intermediate-sized enterprise (ETI) is a company with between 250 and 4,999 employees, and a turnover which does not exceed €1.5 billion or a balance sheet total which does not exceed €2 billion.

A company with fewer than 250 employees, but a turnover greater than €50 million and a balance sheet exceeding €43 million is also considered to be an ETI.

GE (Large enterprise): A large enterprise is an enterprise that has at least 5,000 employees.

A company with fewer than 5,000 employees, but a turnover greater than €1.5 billion Euros and a balance sheet exceeding €2 billion is also considered to be a large enterprise.

**Date of creation of the enterprise - DCREN**

<b>Definition</b>	This variable gives the date when the enterprise was created.
<b>Source and updating</b>	SIRENE register
<b>Length</b>	8
<b>Type</b>	Alphanumeric  It is in YYYYMMDD format.  This day may contain only partial information (older units in the Sirene register). It has only been completed systematically since 1980. Before that date, it was taken from the different trade and companies, industry registers, etc.
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Year and month of enterprise's entry into the dissemination database - AMINTREN**

<b>Definition</b>	<p>This variable gives the year and month when the enterprise was entered into the Sirene database.</p> <p>This variable is intended for a well-informed public.</p>
<b>More information</b>	<p>For new enterprises, this variable is generally close to the effective date of the event of creation or re-activation of the enterprise. However, the month of entry may be different (earlier or later than the variable indicating the enterprise 's date of creation). For example, certain entrepreneurs may make an early declaration of the creation of an enterprise in order to facilitate certain administrative formalities.</p>

""	Not completed
0	Less than €0.5 million
1	From €0.5 million to under €1 million
2	From €1 million to under €2 million
3	From €2 million to under €5 million
4	From €5 million to under €10 million
5	From €10 million to under €20 million
6	From €20 million to under €50 million
7	From €50 million to under €100 million
8	From €100 million to under €200 million
9	€200 million or more

The "not completed" modality is used when the declaring unit does not fit into any of the modalities available.

**Principal activity of the enterprise taken from the ESA - ESAAPEN**

<b>Definition</b>	<p>This variable corresponds to the Principal Activity taken from the Annual Sectoral Survey (ESA). The code is based on the <i>Nomenclature d'Activités Française</i> (French Classification of Activities).</p> <p>This variable is intended for a well-informed public.</p>
<b>More information</b>	<p>The Annual Sectoral Survey (ESA) has replaced the ANNUAL BUSINESS SURVEY (EAE).</p>
<b>Source and updating</b>	<p>Variable updated at the end of June.</p> <p>NB: these updates are not systematically visible in the monthly and daily update files. They are only mentioned in them if another movement affects the establishment. To apply all the updates to this variable, it is indispensable to integrate the stock file from the beginning of July into the processing sequences.</p>
<b>Length</b>	5
<b>Type</b>	Alphanumeric
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	This is a variable calculated by INSEE or declared by enterprises, but checked by INSEE.

**Date of processing the update - DATEMAJ**

<b>Definition</b>	<p>This variable is a piece of information rendering the moment when the event was processed in the SIRENE register.</p> <p>It is a complementary piece of information on the processing of the event affecting the establishment.</p> <p>Remark: requests for entry or updating in the register may be made after or before the effective starting of the activity in the case of creations or the modification in the other cases. In some cases, DATEMAJ may therefore be very different to DATEVE (effective date of the event concerned for the enterprise or establishment).</p>
<b>More information</b>	<p>This variable is mandatory.</p> <p>It contains all the information relating to the date and time of processing the event in the Sirene register.</p> <p>This product is supplied sorted according to SIREN-DATEMAJ: the events must be processed in this order.</p>
<b>Source and updating</b>	SIRENE register
<b>Length</b>	19

**SIRET number of the predecessor or successor - SIRETPS****Definition**

This variable corresponds to the SIRET number of the predecessor or successor associated with the SIRET number concerned by the event.

It is a complementary piece of information concerning the event.

**More information**

The information is entered whenever it is known and validated in the SIRENE register. This is always the case in the declaration of the enterprise taking over another, but not always in the declaration of the enterprise ceasing its activity.

Remark: the predecessor's SIRET number is only completed when the predecessor establishment has closed.

This variable is only available in the daily update file.

**Source and updating**

SIRENE register

This variable is completed and updated from information declared by enterprises.

**Length**

14

**Type**

Alphanumeric

**Completion**

Variable completed in full or partially

**Quality**

INSEE has no control over the quality of this variable. It is either not certified as it is declared by enterprises and not checked by INSEE, or it comes from a source exogenous to the register (survey, administrative source, etc.).

**Telephone - TEL**

<b>Definition</b>	This is the enterprise landline number.
<b>More information</b>	<p>For the Overseas Departments (DOM), the number has 10 characters (it begins with a 0 followed by an international code with 3 digits).</p> <p>Example: for Martinique 0596 42 51 08</p> <p>This variable may contain spaces between groups of digits.</p>
<b>Source and updating</b>	<p>SIRENE register</p> <p>The landline number is an optional variable. It is completed from enterprises' declarations and is never checked or updated.</p>
<b>Length</b>	14
<b>Type</b>	<p>Alphanumeric</p> <p>The variable is left-justified. There may be blanks between groups of digits.</p>
<b>Completion</b>	Variable completed in full or partially
<b>Quality</b>	INSEE has no control over the quality of this variable. It is either not certified as it is declared by enterprises and not checked by INSEE, or it comes from a source exogenous to the register (survey, administrative source, etc.).
